

RENEWABLE ENERGY SECTOR PAY SURVEY 2008

In 2005 The Curzon Partnership and MM&K Limited conducted the UK and Ireland's first ever renewable energy sector pay survey, which generated original and highly valuable data for the participants. Due to its continued success, the survey is now being run for the fourth year with endorsement and support from the BWEA, REA and Scottish Renewables.

Based on the success of last year's format, the positions surveyed will include executive functions (Chief Executive, Finance Director etc.), managerial, commercial and business support roles (Financial Controller, Head of IT, Head of HR etc) as well as a wide variety of professional technical and support roles found in the renewable energy sector. As in previous years, the aim will be to attract participants from across the industry with contributions from wind, wave/tidal/hydro, solar, energy from waste, biofuel/biogas/biomass, hydrogen/fuel cells, equipment manufacturers and service providers. The wide appeal of the survey has seen previous participants range from entrepreneurial start-ups through to integrated energy companies, utilities, consultants and developers.

We will be distributing the input questionnaire electronically in May, collecting data over the summer and reporting back to participants in electronic format in October. The cost of subscribing to the survey is £2,000 with a discount of £200 available for members of the BWEA, REA and Scottish Renewables. If you are interested in participating or would like more information please contact us:
